

August 5, 1951.

Dear Werner:

It is some time since I promised to return the assembly for holding the molecular filters that I borrowed at the time of my visit to Camp Detrick. Unfortunately, I cannot find any record of the name or installation to whom it should be returned. It would save me some embarrassment, and I would appreciate it if you could give me the name and division of the person in biophysics from whom the filter assembly was borrowed. I will send you a copy of our very brief findings rather than take time to mention them right here.

Thanks,

Joshua Lederberg
